DETAILED ACTION

Election/Restrictions

Applicant's election of Group I. in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 64-73 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1711

Claims 56-63 are rejected under 35 U.S.C. 102(b) as being anticipated by Park et al. (Society for Biomaterials article).

Park et al. discloses hydrogel composites of interpenetrating networks of polymers prepared from ethylenically-unsaturated monomers and multiolefinic crosslinking agents (see the entire document). Although pore size values are not particularly recited for the materials of the article, it is held that such properties are inherently possessed by the articles disclosed due to the similarities in materials and the work-up employed.
